Filed: : Concurrently herewith
For: : GATEWAY APPARATUS AND VOICE....
Serial No. : Concurrently herewith

Assistant Commissioner for Patents
Washington, D.C. 20231

INFORMATION DISCLOSURE STATEMENT

SIR:

In order to comply with discretionary regulations 37 CFR 1.97 and 1.98, attached hereto is a copy of Form PTO-1449 and copies of the documents listed thereon. These documents contain information which the Examiner may consider to be important in deciding whether to issue a patent in the instant application.

As these documents are written in a language other than English, English language abstracts are annexed thereto explaining its relevancy in accordance with 37 CFR §1.98 (a)(3).

As this Statement is being filed prior to issuance of a first Office Action, no fee is due.

The present Disclosure Statement is being submitted in compliance with 37 CFR 1.56 as an Examiner might consider any cited document important in deciding whether to allow the application to issue as a patent, but the citation of each document is not to be construed as an admission that such document is necessarily relevant or prior art. No representation is intended

that the cited documents represent the results of a complete search, and it is anticipated that the Examiner in the normal course of examination, will make an independent search and will determine the best prior art consistent with 37 CFR 1.104 (a) and 1.106 (b), and in the course of such search will review for relevance every document cited on the attached form even if not initialed.

Early and favorable consideration is respectfully solicited.

Any fee due with this paper, may be charged on Deposit Account 50-1290.

Respectfully submitted,

Linda S. Chan

INFORMATION DISCLOSURE STATEMENT

Japanese Laid-Open Patent Application No. 9-205461 discloses a priority control system which is provided within an end system of a local area network (LAN) or a TCP/IP network. The priority control system performs a priority control of an IP packet transmitted over the LAN network.

Japanese Laid-Open Patent Application No. 2000-83065 discloses a voice gateway device which transmits a destination inquiry message to an IP address of a second voice gateway device when a call setup request is received from a telephone network. The second voice gateway device collects a dialed numeric character from the inquiry message and transmits the inquiry message to an IP address of a third voice gateway device.

Japanese Laid-Open Patent Application No. 2000-253018 discloses an ATM (asynchronous transfer mode) priority control IP gateway device which interconnects an IP network (or local area network LAN) and an ATM network. The gateway device measures traffic characteristics of IP packets transmitted between the LANs, and allocates the packets to a plurality of ATM connections with different priority levels according to the measurement.

Japanese Laid-Open Patent Application No. 2000-32056 discloses a communication quality controller which determines optimum communication quality from a received datagram according to quality information of connection corresponding to an extracted attribute information of communication.
